EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Werner Stermer on 6/1/2004. The subject torque change does not narrow the scope of the claim language, but rather defines the torque value more consistent with the disclosure.

The application has been amended as follows:

Claim 1, line 8 change "damp" to "dampen".

Claim 1, lines 12-13 delete "being configured to exert a torque of $M \leq 10 \text{ N} \cdot \text{mm}$ " and insert "exerting a maximum torque up to $M (\text{torque}) = 10 \text{ N} \cdot \text{mm}$ ".

2. The following is an examiner's statement of reasons for allowance: Upon review of the prior art of record no holding element for a fuel rod exerting the claimed torque and on a fuel rod tilted at the claimed angle exists as claimed by the applicant.

This statement is not intended to necessarily state all the reasons for allowance or all the details why the claims are allowed and has not been written to specifically or impliedly state that all the reasons for allowance are set forth (MPEP 1302.14).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
